

THE SOLAR INITIATION

(Extract from a Conference of Bernard of Montreal)

SOLAR INITIATION, that is to say the opening of contact between Man and Extraordinary Intelligences, constitutes the ultimate psychological test of the terrestrial, because this test points towards the Elevation of Human Intelligence above all what Man has believed he understood since the beginning of his evolution.

SOLAR INITIATION can only be experienced in relation to the Extraordinary Intelligence which animates each individual and which constitutes the most absolute of Man's psychological experiences, because it cannot be generated by him or his spiritual methods but, by the Ray within him which works under the cover of his subjective thought.

SOLAR INITIATION is the new condition of Man. The starting point towards a psychological unknown which is absolutely distinct from the psychological content which expresses the totality of its experiential consciousness. This psychological unknown is the product of the continuous rapprochement of the Ray of Intelligence which penetrates the Spirit of Man and invests it with a new power on the globe : that of the power of '*Knowledge*'.

But, Man does not know the power of Knowledge, does not know its aspects and dominants so that his learning becomes more and more an unveiling in his Spirit.

SOLAR INITIATION protects the spirit of Man but destroys the curiosity of his intellect in order to increase the Vibration of the Spirit within him. That is to say, of this Consciousness in him which manages, according to the mode of its expression, to dominate everything that concerns him closely. That is to say what he becomes aware of.

The goal of SOLAR INITIATION is to generate sufficient vibrational energy on the terrestrial globe to increase the vibrational rate of planetary consciousness. So that Man can come into contact with his brothers in space.

But SOLAR INITIATION does not commit any Man to immortality unless he can experience all its aspects, all the power of penetration and transformation.

The Man of tomorrow will experience two major possibilities on Earth. Either that of eventually moving to the circle of initiates or that of going beyond this circle in order to form a new one which will become the new center of energy and service for future humanity. The conditions of one passage or another depend on several factors of life which can only be made evident by the paths of evolution followed by each person. The universal character of the SOLAR INITIATION is part of the experience of the two passages.

SOLAR INITIATION is a process of vibrational change which alters the very substance of the subtle bodies of Man. Once the substance of the body has been altered, Man can no longer live his material life according to the canon of past experiences. And this new state predisposes him to experience, at the end of the cycle, the passage of a radiant energy which will alter his Total Consciousness. So that he will be sucked into a force field opening the doors to parallel worlds. So that his present Life will be lived more and more according to this more or less near future. ...
